### **DETAILED ACTION**

This application 09/942,102, has been examined. Claims 1-30 are pending.

## Claim Objections

1. Claims 8, 9, 19, 28, 29 are objected to because of the following informalities: Pursuant to claims 8 and 28, end the claims with a period. Pursuant to claims 9, 19, and 29, at line 2, change "presentation" to –representation--. Appropriate correction is required.

# Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

## Rejection of claims 1-6, 10-16, 20-26 and 30

- 3. Claims 1-6, 10-16, 20-26 and 30 are rejected under 35 U.S.C. 102(b) as being anticipated by Rostoker et al. (Rostoker), U.S. Patent 5,544,067. Rostoker teaches a system for interactive design, synthesis and simulation of an electronic system allowing a user to design a system by specification of a behavioral model in a high level language such as VHDL or by graphical entry.
- 4. Pursuant to claim 1, which recites [a] method of generating a logic design (col. 12, II. 40-4) for use in designing an integrated circuit comprising embedding a combinatorial one-dimensional logic block representing a combinatorial element within a

f

Application/Control Number: 09/942,102

Art Unit: 2825

two-dimensional schematic representation of the logic design to produce a unified database representation of the logic design (col. 26, Il. 4-16).

- 5. Pursuant to claim 2, further comprising generating the combinatorial onedimensional logic block (col. 27, II. 19-40).
- 6. Pursuant to claim 3, further comprising importing the combinatorial onedimensional logic block (col. 27, II. 34-42).
- 7. Pursuant to claim 4, further comprising following a set of design capture rules (col. 27, line 59 to col. 28, line 17).
- 8. Pursuant to claim 5, further comprising notifying a designer when capturing data violates the set of design capture rules (col. 1, II. 44-63, col. 9, II. 16-36).
- 9. Pursuant to claim 6, further comprising using a set of abstractions (col. 7, II. 4-13).
- 10. Pursuant to claim 10, further comprising generating synthesizable Verilog from the unified database (col. 13, line 40 to col. 14, line 17).
- 11. Pursuant to claim 11, which recites [a]n article comprising a machine-readable medium which stores executable instructions to generate a logic design for use in designing an integrated circuit (IC) (Fig. 16 illustrates these limitations); the instructions causing a machine to: embed a combinatorial one-dimensional logic block representing a combinatorial element within a two-dimensional schematic representation of the logic design to produce a unified database representation of the logic design (col. 26. II. 4-16).

Application/Control Number: 09/942,102

Art Unit: 2825

12.

in claim 2, supra, and are likewise rejected here based on similar reasoning.

13. Pursuant to claims 13 and 23, these claims address limitations already rejected

Pursuant to claims 12 and 22, these claims address limitations already rejected

in claim 4, supra, and are likewise rejected here based on similar reasoning.

14. Pursuant to claims 14 and 24, these claims address limitations already rejected

in claim 3, supra, and are likewise rejected here based on similar reasoning.

15. Pursuant to claim 21 which recites [a]n apparatus for generating a logic design

for use in designing an integrated circuit, comprising a memory that stores executable

instructions; and a processor that executes the instructions to (Fig. 16 illustrates these

limitations): embed a combinatorial one-dimensional logic block representing a

combinatorial element within a two-dimensional schematic representation of the logic

design to produce a unified database representation of the logic design.

16. Pursuant to claims 15, 16, 20 and 25, 26, 30, these claims address limitations

already rejected in claims 5, 6, and 9, respectively, and therefore claims 15, 16, 20 and

25, 26, 30 are likewise respectively rejected here based on similar reasoning.

#### Allowable Subject Matter

17. Claims 7-9, 17-19, 27-29 are objected to as being dependent upon a rejected

base claim, but would be allowable if any existing objections are obviated and the

claims are rewritten in independent form including all of the limitations of the base claim

and any intervening claims.

18. The following is a statement of reasons for the indication of allowable subject

matter: Pursuant to Applicants' method of generating a logic design, the prior art does

Art Unit: 2825

not teach generating C++ and Verilog from a unified database. Additionally, the prior art

does not teach the inclusion of Register Transfer Diagrams.

Conclusion

19. The prior art made of record and not relied upon is considered pertinent to

applicant's disclosure. Please reference the PTO-892 for a complete listing.

20. Any inquiry concerning this communication or earlier communications from the

Examiner should be directed to A.M. Thompson whose telephone number is (703) 305-

7441. The Examiner can usually be reached Monday thru Friday from 8:00 a.m. to 5:00

p.m.. If attempts to reach the Examiner by telephone are unsuccessful, the Examiner's

supervisor, Matthew S. Smith, can be reached on (703) 308-1323.

Any inquiry of a general nature or relating to the status of this application or

proceeding should be directed to the receptionist whose telephone number is (703) 308-

0956 or the Customer Service Center whose telephone number is (703)306-3329.

21. Responses to this action should be mailed to:

Commissioner of Patents and Trademarks

Washington, D.C. 20231

or faxed to:

(703) 872-9318, (for **OFFICIAL** communications intended for entry)

(703)872-9319, (for Official AFTER-FINAL communications)

Hand-delivered responses should be brought to Crystal Plaza 4, 2021 South Clark

Place, Arlington, VA., Fourth Floor (Receptionist).

A. M. THOMPSON,

Patent Examiner

23 March 2003
